

Pro Door UK Ltd shutters for security & peace of mind

Today, home security is a very high priority. Whilst intruder alarms will detect burglary attempts, it has to make sense to create a physical barrier to deter thieves from targeting your home.

Pro Door insulated aluminium shutters not only form this physical barrier but help insulation and enhance the look and value of a property.

SPECIFICATION

The shutter curtains are manufactured from powder coated foam filled (CFC free) double wall roll formed aluminium. These are completely maintenance free needing only occasional cleaning.

Guides are powder coated aluminium with neoprene seals to ensure the curtain is very quiet in operation. These seals also form an effective weather and draught barrier

The complete shutter is enclosed in a powder coated aluminium box that protects the mechanism from the elements. This fully assembled box also makes installation very easy

OPERATION

Tape

For small windows and doors, an internal tape pulley provides a simple and effective means of raising and lowering the shutter.

Gear crank

An internal folding handle is fitted. Combined with **Pro Door** "Autolocking" this system provides a very secure barrier

Electric

Electric motor operation with **Pro Door** "Autolocking" provides effortless operation with the best available locking system. For doors, an emergency manual operation is normally supplied so the shutter can be operated in the event of power failure.

OPTIONS (for electric shutters)

- Remote control with photo cell safety beam
- Security key switch
- Internal switches
- Power failure back up system
- Group controls to operate a number of shutters simultaneously
- Light sensors to operate shutters when darkness falls
- Wind sensors to operated shutters when the wind strength exceeds pre-determined levels
- Intruder alarm interfaces - closes the shutters if a break- in is detected
- Fire alarm interfaces

COLOURS (shutter curtains)

White, dark brown, beige, cream, wood effect, silver, bronze, green and red. All these can be supplied with ventilation / light slots
The guides and box are normally supplied in white or brown

ALL MADE TO MEASURE

Security roller shutters for superior protection

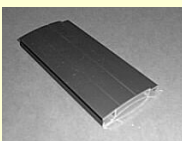

Heavy duty extruded double wall aluminium security shutters for commercial and industrial properties where determined burglary attempts are highly likely.

The shutter curtain is manufactured from a heavy double wall aluminium profile weighing 7.5KGs/m² giving a comparable strength to heavy gauge steel. When fitted with the **Pro Door** security guide and security curtain locks this shutter provides a very high physical barrier to attack

FULL SPECIFICATION

Shutter curtain

Extruded double wall aluminium, 44mm cover x 9mm thick. Weight 7.5KGs/m². The curtain is fully end locked and is fitted with an extruded aluminium bottom rail which incorporates a sealing strip.

A reinforced bottom rail is available as an option. This can be further reinforced with a steel bar insert through the bottom section and for gear and electric shutters a steel side guide lock

Side guides

The standard side guide is manufactured from an aluminium extrusion 53mm wide x 22mm deep and include a neoprene or nylon brush sealing strips. To enhance security, we recommend the **Pro Door** security side guide and security curtain locking.

All gear and electric shutters are fitted with **Pro Door** "Autolocking" which provides the best available resistance to attempts to open the shutter by force

OPERATION Manual

Spring balanced or gear crank operated. For ease of use, large gear crank operated shutters are spring assisted. Gear crank shutters are fitted with **Pro Door** "Autolocking"

Electric

Electric motor operation with **Pro Door** "Autolocking" is standard. Emergency manual operation is available for operation in the event of power failure.

LOCKING

Spring balanced shutters are normally supplied with bottom rail locks. If the **Pro Door** Security side guide is specified, High security side guide pin locks can also be supplied. Gear crank & electric shutters are fitted with **Pro Door** "Autolocking"

COLOURS (shutter curtains)

White and dark brown are the standard colours. At additional cost, shutters can be supplied in most standard RAL or BS colours.
